Samsung I9300 – Galaxy S3 ROOT and UNLOCK procedure.

S3 UNLOCK procedure:

STEP 01: From support zone download file **Samsung_Galaxy_S3_(I9300)_Root.zip**

The screenshot shows the Micro-Box Support Zone website. The header includes the Micro-Box logo, the website name, and a 'Support Zone' banner. A 'QUICK INFO' section displays the last software version (MicroBoxALLinONE V2.1.0.5 CR FINAL) and server status for various brands (LG, Samsung, HTC, BlackBerry, Sagem, Alcatel), all of which are online. The main content area is divided into two sections: 'personal info' on the left and a file listing on the right. The 'personal info' section shows a user's SN (0128D07A14000013) and activation status for HTC, BlackBerry, Alcatel, and LG3G. A green arrow points from the 'personal info' section to the file listing. The file listing shows a directory structure with 'Samsung_Galaxy_S3_(I9300)_Root.zip' highlighted in red. Below the file listing, there are links for activating various devices and a 'Back to Home page' link. The footer contains the Micro-Box logo, website name, and a list of services offered, including activation for various brands and unlock logs. Payment logos for PayPal, VISA, MasterCard, and DHL are also visible.
